LETTER FROM THE CEO AND BOARD PRESIDENT

If numbers tell a story, ours is a multi-volume novel. We just don’t know the ending ... yet.

Family Planning 2020, a worldwide movement supporting the rights of women and girls to decide – freely and for themselves – whether, when and how many children they want to have, reports an unprecedented 290.6 million women and girls in the world’s poorest countries are now able to decide whether and when to get pregnant. That’s an increase of 24.4 million from 2012 and still 10 million fewer than the organization hoped to reach by this time.

In the United States, Title X, the critical social safety net program, provides high-quality reproductive health care for women with and without insurance. According to the Center for American Progress, most patients are uninsured or ineligible for Medicaid. Out of the 4-million Title X family planning clients nationwide, more than half are women of color.

Ninety percent of Title X funds go toward clinical and contraceptive services that prevent an estimated 1,000,000 unintended pregnancies, 501,000 unplanned births, and 345,000 abortions annually. Unfortunately, these facts haven’t doused the ongoing, vitriolic and too-often flat-out false anti-woman, anti-Title X and anti-Planned Parenthood rhetoric.

Nothing changed during 2016. Not the attacks on the human value and financial benefits of Title X services. Not the efforts to make it harder to access those services for those most in need.

And, not our unyielding conviction to provide, protect and ensure the availability of and access to quality reproductive healthcare.

That’s because of the more than 35,000 people in Arizona and millions nationwide who turn to Title X as a reliable and trusted source of high-quality, compassionate and confidential family planning care.

Our numbers show us why: last year, Title X services in Arizona prevented an estimated 7,060 unintended pregnancies, 530 chlamydia and 40 gonorrhea infections and saved Arizona taxpayers more than $61 million in maternal and birth-related costs.

That’s a great story. The milestones you’ll see in this annual report are the foundation for the many chapters yet to be written.

Sincerely,

Brenda L. “Bré” Thomas, CEO
Karilyn Van Oosten, Board President

The Arizona Family Health Partnership provides, promotes and protects access to comprehensive quality reproductive healthcare services and education for all Arizonans, regardless of income, through its support and monitoring of regional healthcare providers.
### 2016 MILESTONES

**SexFYI.org**
In March, AFHP launched a new website, SexFYI.org, for teens and young adults to get simple, accurate information on contraceptive methods and how to locate Title X services. By the end of the year, SexFYI.org had been visited nearly 20,000 times.

**Young Professionals Events**
AFHP hosted 5 Young Professionals events (three in Tucson and two in Phoenix) to introduce young professionals to AFHP, the Title X program and ways to get involved in reproductive health advocacy. Events included delicious food, engaging discussions and even condom demonstrations (using bananas).

**Zika Prevention**
In August, AFHP applied for and received a supplemental grant from the Office of Population Affairs to provide Zika prevention resources, materials and trainings to community partners around the state. As part of these efforts, AFHP bought over 500,000 condoms and has distributed more than half of them to community health centers, non-profits, private practices, county health departments, social service providers, hospitals, and immigrant and refugee, tribal, and homeless service organizations.

**Program Promotion**
AFHP implemented a program promotion campaign that reached out to potential English and Spanish speaking clients through social media (including Facebook and Instagram), and online audio and video promotions through Cox Media and Pandora Radio. The campaigns let listeners know that AFHP is a trusted community resource for non-judgmental, medically accurate and confidential reproductive healthcare information and services.

**Community Outreach**
AFHP’s Program Team tabled at 21 community events and conferences around the state, and provided reproductive healthcare trainings to 568 individuals. Additionally, staff served on several advisory boards including Congressman Gallego’s Women’s Advisory Council, and the Mobilization for Positive Futures and Collective Step for Youth teen pregnancy prevention initiatives in Tucson and Phoenix.

**Chlamydia Screening**
AFHP partnered with the Arizona Alliance of Community Health Centers to apply for and receive grant funding from the Arizona Department of Health Services to continue providing chlamydia screening at our current Title-X health centers as well as an additional four community health centers.

**LARC Committee**
The LARC Plenary Committee continued to meet throughout 2016 with the goal of increasing access to long-acting reversible contraceptives (LARC) throughout Arizona. In a win for the committee, changes in billing at AHCCCS began allowing for separate billing of post-partum LARC in October.
